-

Starting Fuzzy AI

If you decide to start a new scene, skip to *Starting a new scene*. As soon as you import Fuzzy AI onto UFE you will be able to see the following new options:

- Under [Global Editor](#), [AI Options](#) -> [AI Engine: Fuzzy AI](#)
- Under [Character Editor](#), [AI Instructions](#)
- Under [Move Editor](#), [AI Definitions](#)
- New Editor: [A.I. Editor](#) (under Window → U.F.E.)

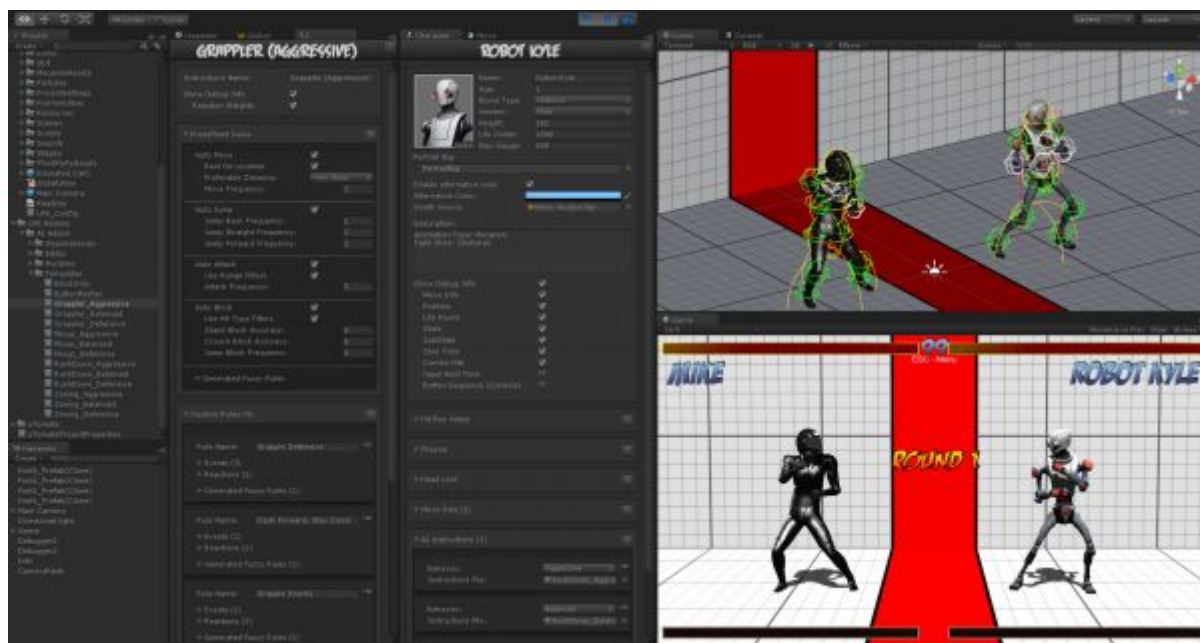

Notes:

- [Global Editor](#) -> [AI Options](#) will now have Fuzzy AI options enabled. Use it to create different difficulty settings. If you are using the UFE_Config.asset file that comes with UFE, you should now see 3 new predefined difficulty settings already assigned by default.
- Before being able to see it in action you need to assign a few instruction files to your characters. Each of the demo characters should now appear with 3 empty [A.I. Instruction](#) slots each. Feel free to choose any of the fighting templates from the folder UFE Addons\AI Addon\Templates. This is my recommendation:
 - *Mike*: Mix-up set (Mixup_Aggressive, Mixup_Balanced, Mixup_Defensive)
 - *Robot Kype*: Rush down set (RushDown_Aggressive, RushDown_Balanced,

RushDown_Defensive)

- *Mecanim Bot | Joan*: Rush down set (RushDown_Aggressive, RushDown_Balanced, RushDown_Defensive)

- Recommended Layout:

Updates

If you prefer to update Fuzzy AI manually, follow the procedures below: **Remember to always backup projects before importing a new update!**

- Close Unity.
- Replace the files under `.\UFE Addons\AI Addon\Runtime\` and `.\UFE Addons\AI Addon\Editor\` with the files from the new version.
- (Optional) Replace the files under `.\UFE Addons\AI Addon\Templates\` to update the AI Instruction templates.
- Open Unity.
