

Preload

Before the battle starts UFE attempts to preload some of the Game Objects. Select (or deselect) if you feel like this is causing issues in your game.

Preloading Time: How long should the preloading time be? This will be how long to wait in the Loading Battle Screen.

Hit Effects: Untoggle to stop the engine from pre-loading the Game Objects from [Global Editor -> Hit Effects](#).

Stage: Untoggle to stop the engine from pre-loading the selected stage prefab.

Warm All Shaders: Run Unity's own Preloader technique before the battle starts. (for more information [click here](#))

Code access:

UFE.config.preloadOptions
